THE TAXONOMY OF EDGE

33,090 posts distilled into 8 structural archetypes.
The objective is not to copy the trader, but to decouple
their mechanical edge from their behavioral leaks.

[THE ARCHETYPE] > OPTIONS INCOME / WHEEL

CATEGORY: Options Income / Wheel

MECHANICS:

Cash-Secured Puts (CSPs) and Covered Calls (CCs) on high-IV targets. Systematic theta harvesting.

[THE TARGETS] > QUANT CARDS

[QUANT CARD] > @BOBDOG

Alpha Score: 74

Follow-Through: 41.8%

[QUANT CARD] > @RISE

Alpha Score: 71

Follow-Through: 76.1%

[THE EXTRACTION] > INGEST PROTOCOL

INGEST

Harvest the mechanical 70-90% profit-decay buyback rule and IV-mean-reversion mechanics.

Isolate the theta engine; explicitly firewall their emotional revenge-trading and naked long-option gambles.

[THE ARCHETYPE] > ODTE / INDEX SCALPING

CATEGORY: ODTE / Index Scalping

MECHANICS:

Intraday options flow, level-to-level momentum, and dealer-gamma positioning on SPY/QQQ.

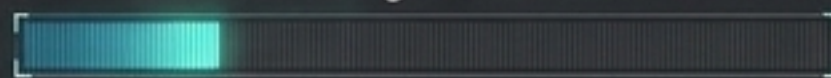

[THE TARGETS] > QUANT CARDS

[QUANT CARD] > @ALLOY

Alpha Score: 47

Follow-Through: 24.3%

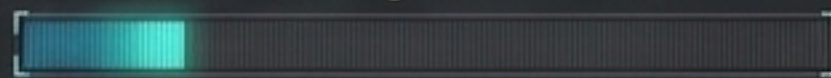

[QUANT CARD] > @SE83

Alpha Score: 46

Follow-Through: 19.2%

[THE EXTRACTION] > INGEST PROTOCOL

INGEST

Harvest their time-of-day volatility regime frameworks (e.g., 9:30-10:15 OTM window, 2:00-4:00 convexity zone) and GEX / Open-Interest positioning levels.

FIREWALL

Completely ignore self-reported PnL and curated brag posts. Do not mirror directional sizing.

[THE ARCHETYPE] > MOMENTUM / SWING

CATEGORY: Momentum / Swing

MECHANICS:

Riding thematic narratives, small-cap volume breakouts, and crowd-sourced catalyst momentum.

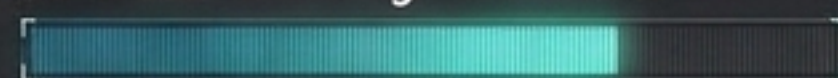

[THE TARGETS] > QUANT CARDS

[QUANT CARD] > @internetdialup

Alpha Score: 58

Follow-Through: 72.0%

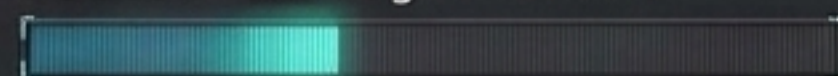

[QUANT CARD] > @YungEmber

Alpha Score: 58

Follow-Through: 39.5%

[THE EXTRACTION] > PROTOCOL

INGEST

Treat their feeds as an early-warning discovery radar for pre-market volume and catalyst momentum.

FADE

Fade their exit timing. Chronic bagholding and documented 40-64% single-name drawdowns prove their exit logic must be actively inverted or ignored.

[THE ARCHETYPE]

> Long-Term Compounder

CATEGORY: Long-Term Compounder

MECHANICS:

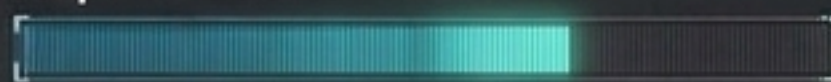

Multi-year fundamental accumulators, heavily concentrated in high-conviction, quality core equities.

[THE TARGETS]

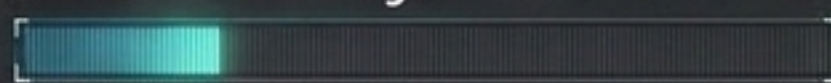

> QUANT CARDS

[QUANT CARD] > @Tiger_

Alpha Score: 68

Follow-Through: 27.2%

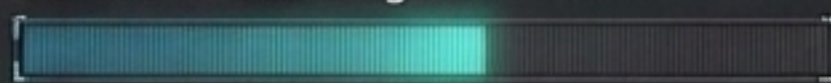

[QUANT CARD] > @DocHollywood

Alpha Score: 61

Follow-Through: 57.8%

[THE EXTRACTION]

> PROTOCOL

INGEST

Auto-tag names moved to >10% portfolio weight for independent fundamental verification. Track structured sector-rotation baskets (e.g., the DIP Index).

FIREWALL

Firewall their risk parameters. Zero stop-loss discipline means single names routinely run 20-50% of book. Apply institutional position caps independently.

[THE ARCHETYPE] > MACRO / HEDGING

CATEGORY: Macro / Hedging

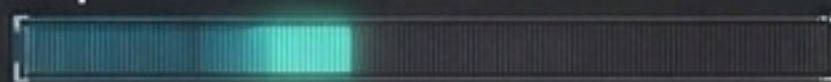

MECHANICS:

Trading geopolitical shocks, monetary policy shifts, and supply-chain macro trends.

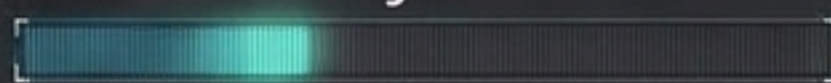

[THE TARGETS] > QUANT CARDS

[QUANT CARD] > @longwashere

Alpha Score: 41

Follow-Through: 35.3%

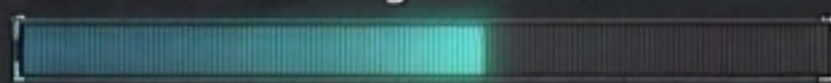

[QUANT CARD] > @DocHollywood

Alpha Score: 61

Follow-Through: 57.8%

[THE EXTRACTION] > PROTOCOL

INGEST

Extract supply-chain/rumor-arbitrage templates and mechanical macro-shock “hedge but hold” responses.

FADE

Fade apocalyptic narratives and perma-bear framing. Treat aggressive bearish put disclosures during uptrends as a retail-sentiment-extreme tell.

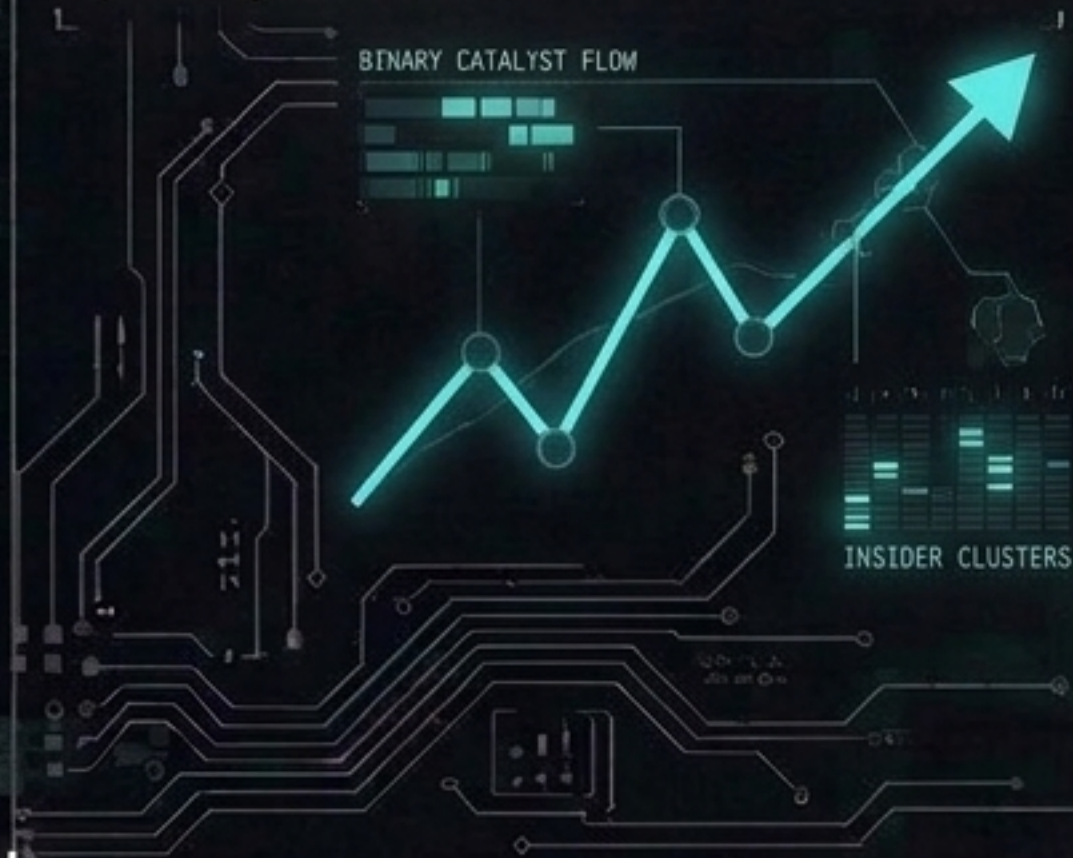

[THE ARCHETYPE]

> Event-Driven / Special Situations

CATEGORY: Event-Driven / Special Situations

MECHANICS:

Trading hard, binary catalysts—regulatory approvals, Form-4 insider buying clusters, and policy shifts.

[THE TARGETS]

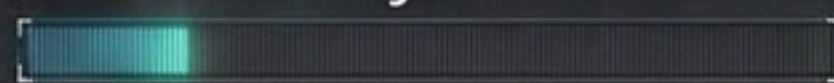

> QUANT CARDS

[QUANT CARD] > @SE83

Alpha Score: 46

Follow-Through: 19.2%

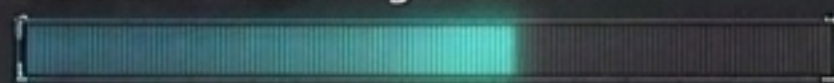

[QUANT CARD] > @Drone_Daddy

Alpha Score: 41

Follow-Through: 59.4%

[THE EXTRACTION]

> PROTOCOL

INGEST

Harvest insider Form-4 clusters and defense/policy catalyst tracking before the retail crowd arrives. Treat these accounts as SEC-filing alerting mechanisms.

FIREWALL

Firewall execution when catalysts slip. Do not copy penny/distressed single-name calls if the original binary date is missed.

[THE ARCHETYPE] > Signal Vendor / Educator

CATEGORY:

Signal Vendor / Educator

MECHANICS:

Traders explicitly funneling retail flow into paid Discords, Substack tiers, and proprietary indicators.

[THE TARGETS] > QUANT CARDS

[QUANT CARD] > @Rise

Alpha Score: 71

Follow-Through: 76.1%

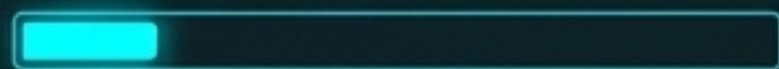

[QUANT CARD] > @Legitimate_Risk

Alpha Score: 58

Follow-Through: 17.8%

[THE EXTRACTION] > PROTOCOL

INGEST

Use their community tip-sharing strictly as a pointer graph to map upstream, original sources.

FIREWALL

Firewall all data post-monetization.

Apply a heavy, systemic discount to all performance claims, PnL screenshots, and win-rates published after a Substack/Discord launch.

[THE ARCHETYPE] > High-Risk / Gambler

CATEGORY:
High-Risk / Gambler

MECHANICS:
Over-leveraged microstructure gamblers, halt-list snipers, and cyclical account blow-ups.

[THE TARGETS] > QUANT CARDS

[QUANT CARD] > @AtypicallyErect

Alpha Score: 34

Follow-Through: 25.4%

[QUANT CARD] > @WarrenBuffett

Alpha Score: 19

Follow-Through: 44.3%

[THE EXTRACTION] > PROTOCOL

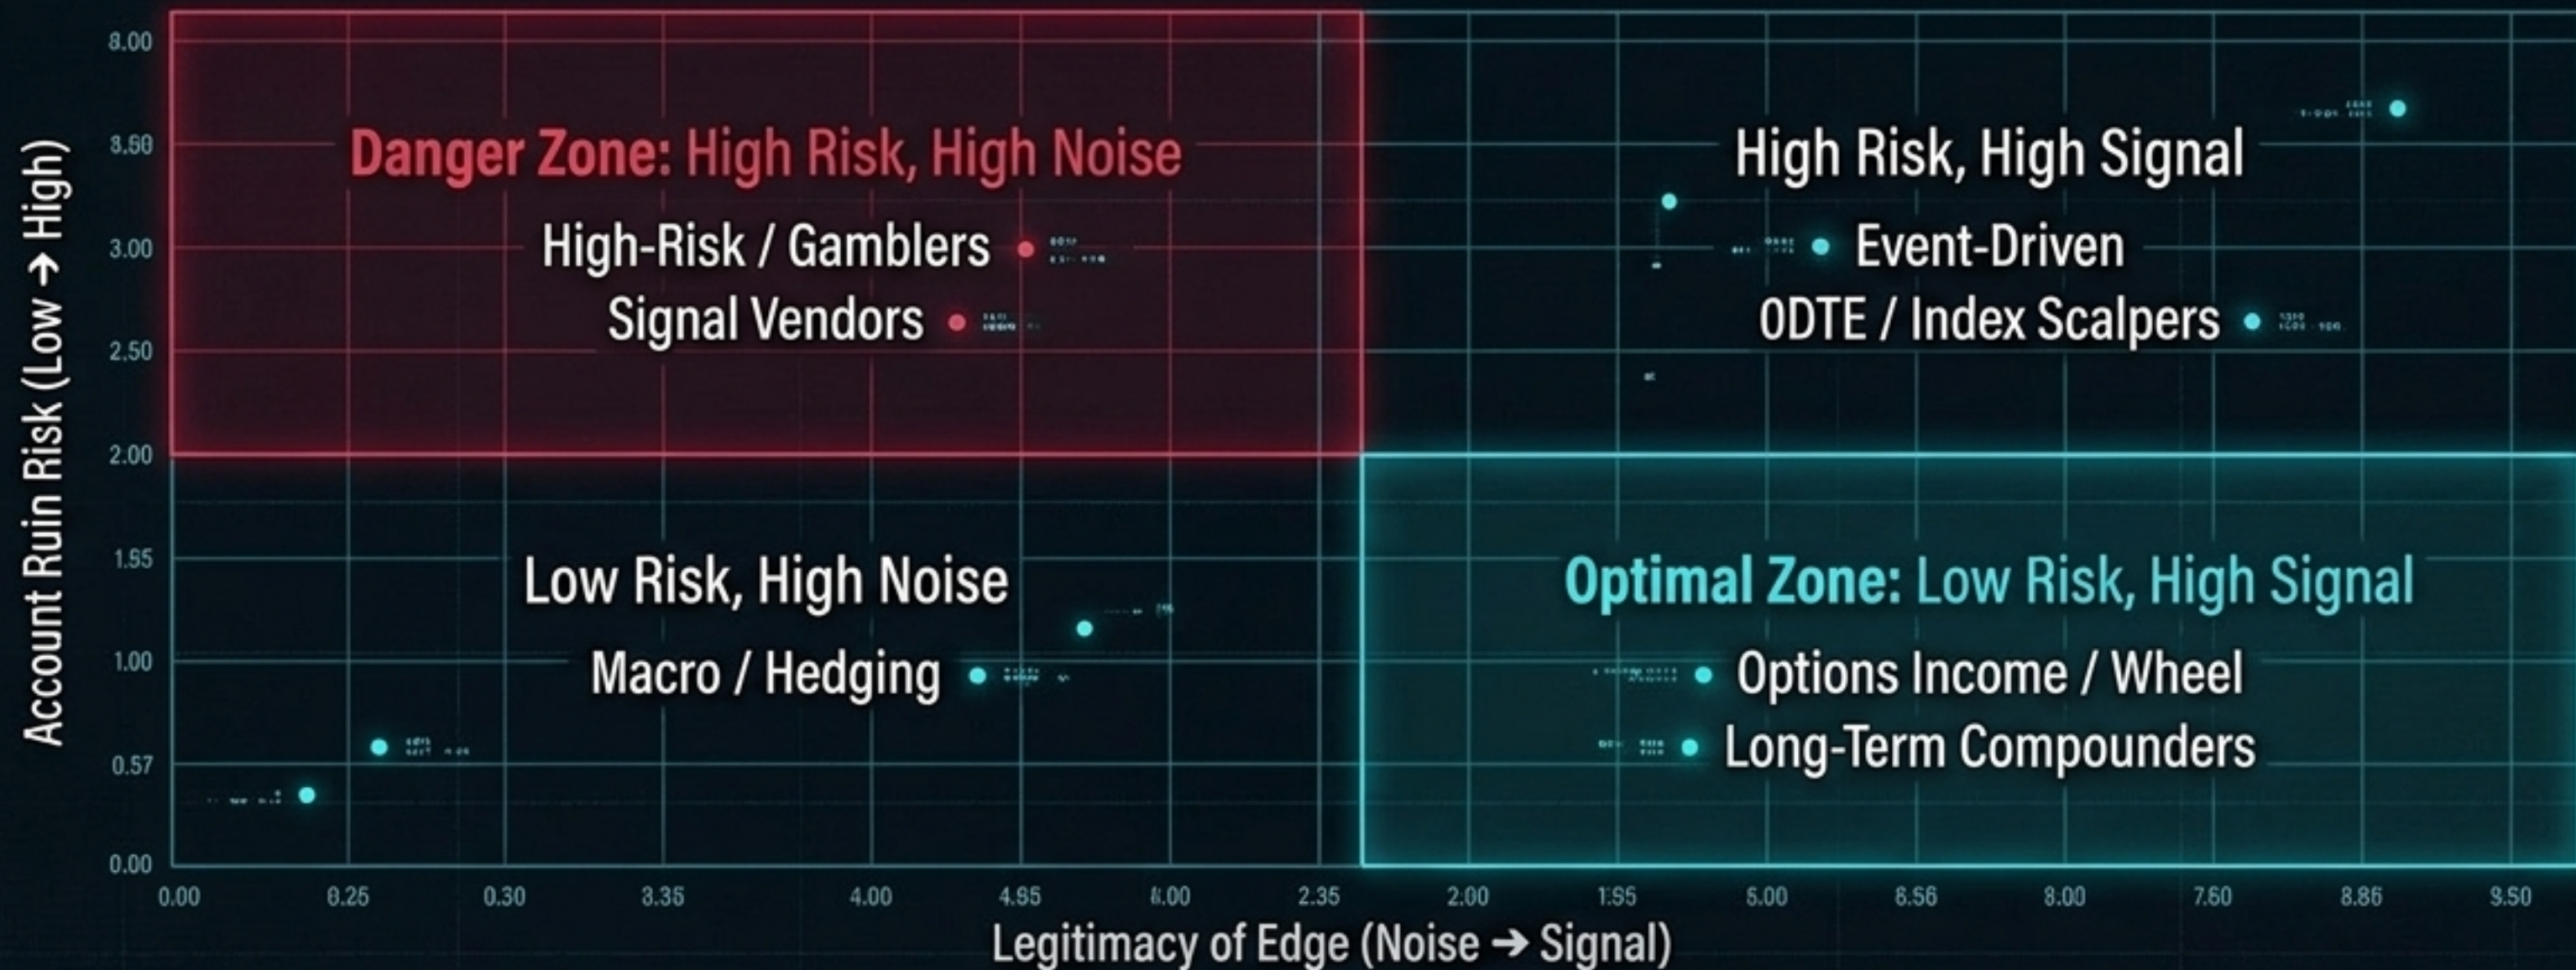

INGEST

Halt-list scanning methodologies, stock-lending-fee monitors, and earnings-calendar awareness are genuine alpha sources.

FADE

Fade the execution. These signals must be extracted and paired with external, algorithmic stop-losses. Active margin escalation under stress is a terminal risk.

[THE EXPECTANCY MATRIX: VERDICT & CAPITAL ALLOCATION]

True alpha is extracted by decoupling a trader's mechanical rules from their human behavioral flaws. Only mechanical premium sellers and fundamental compounders exhibit repeatable, standalone edge.
